Immersion Graphics Inc. Provides Audio/Visual Systems Integration for New Bosch Technical Center

Commerce, MI – Immersion Graphics Inc. has concluded a large-scale, multi-phase audio / visual installation at the newly completed Bosch Technical Center located in Plymouth Township, Michigan. The project, completed at the end of April, included installation of projectors and audio systems in 28 conference rooms and the cafeteria.

“Immersion Graphics has met and exceeded our expectations,” said Harold Domke, Director of Facilities, Robert Bosch LLC. “The design, installation, and follow-up have been great and we look forward to our continued relationship with Immersion Graphics.”

“We are honored that Bosch has selected Immersion Graphics to provide the communication and projection systems for their new technology center in Plymouth Township” said Pat Hernandez, President, Immersion Graphics Inc. “It’s exciting to be a part of a project that is contributing to the continued economic growth here in southeast Michigan.”

About Immersion Graphics Inc.

Since 1998, Immersion Graphics Inc. has been designing, delivering and servicing audio / visual systems as well as large-scale, high-resolution rear-projection systems for the automotive design community, higher education, medical and financial institutions, as well as the United States Military and several other government agencies. Immersion Graphics Inc. provides a suite of services that includes product sales, rentals, consulting, design, engineering, custom fabrication, installation and service. Applications include: design studios, conference rooms, boardrooms, control rooms, classrooms, trade shows, and digital signage.
